

Explanation of how to calculate GPA

Each grade is assigned the following point value.

-Yearlong classes are English, Math, Social Studies, Science, Band, and Choir. Health and PE are also worth full points because they are semester long classes.

-Vocational classes are only worth half points because students only have these classes for one nine weeks. Vocational classes are Music, Art, Keyboarding, and Business Math.

-Developmental Guidance is only a participation grade so it is not calculated in the GPA.

Yearlong Classes/Health/PE

A=4

B=3

C=2

D=1

F=0

Vocational Classes

A=2

B=1.5

C=1

D=.5

F=0

-After assigning points to all the grades, you will add up the points.

-Divide the total points by the number of grades.

-Remember that Developmental Guidance doesn't count in the GPA so you also don't count it in your total number of grades.

-Vocational classes are only considered .5 when calculating number of grades.

-Yearlong, Health, and PE are counted as 1 grade.
